

Panagiotis Tsarchopoulos is a Project Officer at the FP7-ICT Programme of the European Commission. He is coordinating the "Computing Systems" research objective which looks for breakthroughs in programmability, performance and power efficiency of multicore computing systems through advances in computer architecture, systems software, tools and parallel programming models and languages. Dr. Tsarchopoulos holds a PhD in Computer Engineering from the University of Kaiserslautern, Germany and an MBA from the UBI, Brussels, Belgium.
